

Summary

- A Senior Software Engineer with 3 years of hands-on experience building and maintaining backend components and REST APIs using Java and Spring Boot, with strong foundations in Data Structures & Algorithms.

Experience

Canon (via Path Infotech)

Senior Software Engineer

Gurgaon

May 2026 – Present

- Designed and implemented a scalable backend solution using HashMaps, cutting application processing time from **8 to 3 minutes (70% faster)** and improving system performance and reliability under load.
- Strengthened operational robustness by reducing the application failure rate **by 50%**, enabling a **100% success rate** on a large-scale data read of **100K records**.

Career Break

Oct 2025 – May 2026

- Career break due to family medical reasons.

Leapwork

Software Engineer

Remote

Mar 2023 – Oct 2025

- Designed and delivered a scalable backend feature with clean, well-documented code **across 4 teams** (30+ developers), driving an **80% efficiency** gain and **50% faster** incident resolution.
- Reduced Microsoft Dynamics 365 production **errors by 15%**, cutting production **bugs by 10%**.
- Resolved a critical production incident via targeted root-cause analysis, helping secure a \$90K enterprise deal and enabling **60% faster** incident turnaround.

Achievements

- VP of Engineering Recognition: Resolved a critical production incident through strong debugging skills, securing a \$90K deal and earning recognition from the VP of Engineering and Engineering Manager.
- Problem Solving: Solved **250+** problems | Contest Rating: 1,265 [LeetCode](#)

Skills

- Technologies: **Java, Spring Boot, REST APIs**, JavaScript, SQL, OOP
- Architecture & Tools: MVC Architecture, Maven, IntelliJ IDEA

Personal Projects

ECommerce Spring Boot API

[GitHub](#)

Java, Spring Boot, JPA, RESTful APIs, Maven

- Developed REST APIs using Java Spring Boot by implementing layered architecture, input validation, and global exception handling, which led to scalable and robust backend services.

Car Showcase Platform

[GitHub](#)

Spring Boot, Java, REST APIs, JPA/Hibernate, MVC Architecture

- Built Spring Boot backend services by implementing JPA/Hibernate, REST APIs, and MVC architecture, which led to a scalable and maintainable system.

Education

Lovely Professional University (LPU)

Bachelor of Technology – Computer Science and Engineering

Phagwara, Punjab

2018 – 2022
